WORK EXPERIENCE

Web Developer | Deloitte USI, Hyderabad   **November 2020 - Present**
- Deliver 30+ user stories by developing new features for a tax web application in an Agile environment.
- Build smooth and dynamic front-end for 15+ web pages using Javascript, Knockout.js and jQuery.
- Implement responsive web design for 10+ web pages by using CSS media queries and HTML.
- Develop back-end logic by writing efficient C# code and Oracle queries.
- Apply design and coding practices such as DRY and SOLID principles.
- Improve security of application by eliminating risks such as cross-site scripting and XML injection.
- Collaborate with the server configuration team to troubleshoot and contribute in fixing AWS cloud migration issues and Azure Devops code deployment issues.
- Participate in sprint planning, daily scrum calls and sprint retrospectives.
- Coordinate with business analysts, consultants and managers to understand user's needs, and contribute in pitching in technically feasible approaches to help achieve user's needs.

DevOps Intern | Deloitte USI, Hyderabad   **January 2020 - June 2020**
- Automated the process of monitoring expiration dates of .ipa files, by writing a PowerShell script and integrating it to all build pipelines, which saved an average of 20+ hours of manual effort per month.
- Automated the scheduled restart of MongoDB service by building an Azure DevOps release pipeline.

PROJECTS

SuperSkin - Front-end development of an E-commerce website   **Code**
- Created a responsive E-commerce website from scratch using React, Firebase, Express and Stripe.
- Includes features to search and filter for products, add items to cart and proceed to checkout, process payments, view order history, user login and sign up.
- Built the front-end using React, used React Context API for state management, and React-router-dom for the routing.
- Implemented responsive web design using HTML, CSS and Sass.
- Integrated Stripe for payment processing, and used Express to develop a Post API to help create payment requests to Stripe.
- Cleaned and parsed JSON data returned from HTTP requests.
- Utilized Firebase realtime database for storing data, Firebase authentication to authenticate users in sign-in/login page, and Firebase hosting to host the application.

Watch and Listen - Full stack MERN web application development   **Code**
- Created a web application to allow users to create their own customized list of youtube videos and images to watch them distraction free.
- Built the front-end using React, and used React Context API for global state management of user's data.
- Integrated Youtube iframe API to embed youtube video player in the application.
- Developed APIs using Node.js Express to store and fetch user's data from MongoDB.
- Utilized JWT to secure the API calls, and used bcryptJS to hash user's passwords.
- Used axios to perform http requests of the API calls.
- Made use of Mongoose to provide schema validation and to translate between objects in code and the representation of those objects in MongoDB.

SKILLS

Web Development:

Front-End: JavaScript, jQuery, React, HTML, CSS, SASS	Back-End: C#, ASP.NET, Express, Node.js
Database: Oracle	Deployment: Azure DevOps Pipelines
Practices: Agile and Scrum methodologies	Version Control: Git

EDUCATION

Bachelor of Engineering in Computer Science (B.E CSE)   **2016 - 2020**
Muffakham Jah College of Engineering and Technology, Hyderabad
